

Bull Reproduction Quiz – Answer Key

Name _____

Identify and label the following parts:

- 1) J – Scrotum
- 2) D – Testis
- 3) C – Head of Epididymis
- 4) F – Tail of Epididymis
- 5) M – Sigmoid Flexure
- 6) B – Vas Deferens
- 7) H – Bladder
- 8) I – Ampulla
- 9) E – Rectum
- 10) G – Prostate
- 11) A – Cowper's Glands
- 12) K – Retractor Muscle
- 13) L – Seminal Vesicles

- A) Cowper's Glands
- B) Vas Deferens
- C) Head of Epididymis
- D) Testis
- E) Rectum
- F) Tail of Epididymis
- G) Prostate
- H) Bladder
- I) Ampulla
- J) Scrotum
- K) Retractor Muscle
- L) Seminal Vesicles
- M) Sigmoid Flexure

Match each part to their correct function:

- | | |
|---------------------|---------------------|
| A) Cowper's Glands | G) Bladder |
| B) Vas Deferens | H) Ampulla |
| C) Seminal Vesicles | I) Scrotum |
| D) Penis | J) Retractor Muscle |
| E) Rectum | K) Testis |
| F) Epididymis | L) Prostate |

- 1) I Protects by regulating temperature.
- 2) F Tightly packs sperm and keeps them immobile.
- 3) J Pulls penis back into original position.
- 4) L Secretes some of the liquid volume in semen.
- 5) E Used as an exit for solid waste material.
- 6) H Storage for sperm before they enter the seminal vesicles.
- 7) A Provides a nutrient source for sperm.
- 8) B Transports sperm and semen from epididymis to ampulla.
- 9) D Male organ for copulation.
- 10) C Helps create semen.
- 11) K Serves as the sperm production "factory."
- 12) G Storage site for liquid waste material.
