

RealCare® Baby Simulation Report

Baby Temperature and Clothing

NOTE: Actual report images may vary.

Baby detects temperature, clothing, and length of time in car seat/carrier to address flathead syndrome. Missing clothing only appears if Baby detects no clothing during a significant period of time.

Look for spikes in temperature on the graph below to determine mishandling. Baby's temperature should fall inside the comfort range (in green – mid section of report). If Baby's temperature falls above or below the comfort range, Baby has been exposed to extreme temperatures for an extended period of time.
